# Monday 2nd October **Construction Day**

Let's explore your inner builder as we create with timber today, utilising different power tools and a variety of materials. Start by designing, measuring and cutting your timber to size, then join the pieces together using nails, glue and screws. We will also be working on our ramps and making adjustments to these for our scooters and skateboards. You can also create some new projects for home—throughout the holidays you will be able to continue to access the construction materials to finish any projects you start today. In the indoor environment we will be challenging the children to see what they can build, like a balloon launcher, or maybe a hockey table for our games area!
